PROFESSIONAL SUMMARY

Textile Engineering graduate (B.Sc., Wet Process Engineering, 2026) and Champion of Textile Talent Hunt 9.0, with hands-on experience across knit dyeing, finishing and garment assembly operations in Bangladesh's leading factories. Proven problem-solver who has cut process time and steam consumption through data-driven improvement, and who leads with a hands-on, take-ownership mindset. Eager to join UNIQLO's UMC program to raise Quality, Cost and Delivery (QCD) at factory level, and to help change conventional wisdom in apparel manufacturing.

PROFESSIONAL EXPERIENCE

Intern Trainee | Epyllion Group, Bangladesh *Aug – Sept 2026*

- Mapped end-to-end production flow at **Epyllion Textile Division**, from yarn receiving and circular knitting to dyeing, mechanical/chemical finishing and industrial washing, to identify bottlenecks affecting QCD.
- Designed recipe in ORGATEX and dyed 5kg fabric in Fongs machine (for sample) and matched shade with spectrophotometer.
- Tracked the full garment lifecycle at **Epyllion Style Ltd.** (fabric spreading, cutting, sewing lines, embellishment, final packing) across production lines.
- Co-developed a product with garment technologists in the PDC department, translating design requirements into manufacturing output.

Research Assistant | Bangladesh University of Textiles *Oct 2025 – May 2026*

- Pioneered an eco-friendly non-aqueous dyeing process using a reverse micelle system, aiming to eliminate water discharge in textile processing.
- Executed controlled dyeing on more than 180 trials on a Datacolor Ahiba IR lab machine, applying rigorous experimental discipline and data analysis.

Chemistry Instructor | Udvash Academic and Admission Care *Apr 2023 – Dec 2025*

- Taught chemistry to admission aspirant students over 2.5 years, developing problem-solving techniques inside students.
- Managed a demanding teaching schedule alongside full-time university studies, demonstrating resilience and time management.

EDUCATION

B.Sc. in Textile Engineering (Wet Process Engineering) | Bangladesh University of Textiles *Graduating 2026 | CGPA: 3.26*
HSC | Dhaka College *2021 | GPA 5.00/5.00*
SSC | Ideal School & College *2019 | GPA 5.00/5.00*

LEADERSHIP & PROJECTS

Champion, Textile Talent Hunt 9.0 | Innovation Project at Alliance Knit Composite Ltd (AKCL) **Link** **Document**
"Reduction of steam consumption in 100% cotton S/J fabric (White and Dark shades) through optimized combination of NaOH and Hydrogen Peroxide in pretreatment"

- Spearheaded a literature review and data analysis to pinpoint steam-consumption hotspots in cotton pretreatment.
- Implemented an alternative chemical that shortened process time and achieved the target shade more efficiently, cutting steam use by 6% for dark and medium color and 12% for light color and saving an estimated 1 cr/year.
- Audited the full dyeing and finishing line (Sclavos, Fongs, MCS, Thies, Brazzouli) and applied an advanced method to reach the desired scouring shade.
- Analyzed operational energy data and determined why Whiteness Index and Absorbency are non-critical for light-shade dyeing, avoiding unnecessary process cost.

Competitions and Development

- Led teams to 2nd Runner-Up (Hult Prize BUTEX 2022) and Finalist (Hult Prize BUTEX 2024) in business case competitions, pitching under tight deadlines.
- Organized Butex-ITET DyeChem Expo 2026 | Showcasing 33 chemical companies in first chemical exhibition in Butex Campus.
- Graduated from the Aspire Leaders Program, Aspire Institute (June 2026), strengthening global leadership skills.
- Represented Ideal Debating Club and Dhaka College Debating Society, sharpening persuasive communication and critical thinking.
- Completed Lean Six Sigma White Belt (LSSWB) certification, building a foundation in continuous improvement.
- Completed "Factory Skills Development in Knit Dyeing & Finishing" (Textile Today), CRISAT Level 1 training, and "Digitalizing Textile Sustainability with Sattva."

SKILLS & LANGUAGES

Languages: Bengali (Native) | English (Professional)
Technical: Knit dyeing and finishing | Process optimization and QCD | Lean Six Sigma (White Belt) | Energy and resource efficiency | Quality control | Sustainability | Lab dyeing | MS office| Data analysis|
Core Strengths: Analytical problem-solving | Resilience under pressure | Rapid adaptability | Hands-on leadership | Stakeholder communication | Willingness to travel regularly to factory sites.
